

PARLORPAL®

ParlorPal® provides a safe, effective and affordable solution to control ammonia and lower pH in livestock operations. As the strongest dry mineral acid available, ParlorPal® activates immediately to neutralize ammonia, provide residual ammonia and odor control, and create a low pH environment.

SAFE

Helps create a safe environment for animals and workers

- Eliminates ammonia to lower stress and reduce production losses due to compromised animal respiratory systems
- Decreases ammonia exposure for a safer working environment

FLEXIBLE

Suitable for use across dairy and livestock operations for hoof care and bedding management

- Dairy footbaths
- Bedding areas
- Calf pens
- Free stalls

ECONOMICAL

Decreases operation costs

- Allows for extended bedding use
- Low addition rate

SUSTAINABLE

An environmentally-friendly, natural mineral acid

- Reduces environmental emissions
- Free of heavy metals (copper or zinc) and toxins
- Breaks down into products naturally found in the environment (hydrogen, sodium and sulfate)
- Manufactured with cradle-to-use traceability
