

# Consistent, Effective Ammonia Control and pH Suppression

## 30 Years Proven Efficacy

PLT® is a mineral-based acidifier that eliminates ammonia for improved air quality and lowers pH to create a more favorable environment for birds. Top producers choose PLT because it controls ammonia and lowers pH better than the competition – and keeps them lower for longer.

As a non-hazardous and non-alum based product, PLT supports a safer environment.

### SAFE

- Safe to apply any time
- Non-hazardous
- Only EPA Safer Choice amendment
- Free of heavy metals and toxins

### FLEXIBLE

- Suitable for any poultry house and production model
- Quick service from local applicators
- Unmatched flexibility on application timing (pre- set-up through mid-flock, spot application and beyond)

### ECONOMICAL

- Decreased fuel costs with extended ammonia control
- Increases values of litter as fertilizer
- Lower ammonia improves bird performance

### SUSTAINABLE

- Reduces environmental emissions
- Breaks down into products naturally found in the environment

### LITTER MANAGEMENT EDUCATION

PLT® is backed by an expert team with decades of live production experience who understand the importance of litter management and can provide valuable litter education.
